SUMMARY

Full-stack developer (React, Node.js, Express) who builds and deploys complete applications, including REST APIs and token-based authentication. BSc Information Technology graduate, December 2026, seeking junior / entry-level roles.

TECHNICAL SKILLS

Languages: JavaScript, Python, C

Frontend: React, HTML5, CSS3, Vite, Webpack

Backend & Data: Node.js, Express, RESTful APIs, JWT authentication, Database Systems

Testing: Jest, Vitest, SuperTest

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), GitHub Pages, Linux, Render, Vercel, Netlify

TECHNICAL PROJECTS

Messaging Application [Live demo](#) | [GitHub](#)

React, Node.js, Express, CSS3

- Built a Discord-inspired messaging app with a React front end and an Express backend.
- Designed a RESTful Express API and implemented user session management on the backend.
- Built the React interface with frontend optimization practices to keep rendering responsive.

Blog Application [Live demo](#) | [GitHub](#)

React, Node.js, Express, JSON Web Tokens (JWT), vanilla CSS

- Built a full-stack blogging platform with user authentication and route-level authorization using JSON Web Tokens.
- Designed and consumed custom RESTful endpoints for content creation, data retrieval and application state.
- Built a fully responsive interface from scratch in React and plain CSS, with no UI framework.
- Set up a GitHub Actions pipeline that builds the Vite client and deploys it to GitHub Pages on every push to main, with API URLs supplied as build-time environment variables.

Shopping Cart Application [Live demo](#) | [GitHub](#)

React, React Router, Context API, Vite, CSS3

- Built a multi-page shopping cart in React with React Router, with cart state shared across pages through the Context API.
- Handled asynchronous data loading with error handling for failed requests, and added CSS animations for loading states.

EDUCATION

Pioneer International University

Expected December 2026

Bachelor of Science in Information Technology

- Relevant coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems, Networking, Systems Analysis & Design.

The Odin Project

Expected December 2026

Full Stack Web Development Curriculum

- Project-based curriculum focused on hands-on full-stack software development.
